In Chicago, the Plumbers Local 110 union dyes the river Kelly Green. The dye lasts for around five hours.

How Did 300 South Riverside Plaza Prepare for Extreme Cold Weather?

When Chicago accumulated 36.2 inches of snow in only 22 days, 300 South Riverside Plaza ensured the building ran as usual. Interested to know how? Read below!

- Operate heat 24/7
- Maintain chilled and hot water circulating pumps and coil valves for full, uninterrupted circulation
- Lobby revolving doors kept unlocked, until 8pm, to avoid cold air infiltration via push doors
- Ensure dry pipe systems drained
- Monitor conditions; continuously communicate across all departments
- Immediately clear snow within walkways, on property
- Perform additional exterior building rounds, check for fallen ice
- Stagger shifts to keep staff safe and warm from weather conditions
- Engineers monitor Building Automation System (BAS) supply and return temperatures for issues or abnormal readings
- Maintain adequate fuel for the generator

Thank you all Departments!
